

Clinic S - Week 13 of 2023 Report

This report details the key performance indicators for Clinic S during the period from March 27th to April 2nd, 2023.

Patient Volume and Care:

Clinic S served a total of 1,513 patients during this period. The average time for patients to be served was 13 minutes. Analyzing the data based on urgency levels, patients categorized as "Urgent" waited an average of 3 minutes, "Semi-Urgent" patients waited 7 minutes, and "Non-Urgent" patients waited an average of 11 minutes. Patient satisfaction scores averaged 3, indicating a need for potential improvement in patient experience.

Operational Efficiency:

The number of readmissions for the week was 4, highlighting a need for further assessment and potential interventions in post-discharge care. 8 medical licenses were presented, demonstrating adherence to staff credentialing standards. A total of 56 staff training hours were dedicated to enhancing skills and knowledge. The utilization rate of equipment and resources was 46%, indicating efficient resource allocation. Clinic S ordered and consumed 2,070 supplies, highlighting the volume of patient care provided. The turnover rate of staff stood at 15%, suggesting potential areas for improvement in staff retention.

Financial Performance and Outpatient Services:

The average cost per patient was \$147. Clinic S saw 336 outpatient appointments, demonstrating a strong commitment to community health. There were 17 emergency room visits, indicating a moderate demand for acute care services. 8 surgical procedures were performed, reflecting the center's capability in surgical interventions. The bed occupancy rate was 32% after experiencing a random winter increase, indicating a moderate level of resource utilization during this period.
