

Clinic V - Week 21 of 2023 Report

This report details the key performance indicators for Clinic V during the week of May 22nd to May 28th, 2023.

Patient Volume and Care:

Clinic V served a total of 732.74 patients during this period. The average time for patients to be served was 5 minutes. Analyzing the data based on urgency levels, patients categorized as "Urgent" waited an average of 1 minute, "Semi-Urgent" patients waited 3 minutes, and "Non-Urgent" patients waited an average of 5 minutes. Patient satisfaction scores averaged 5, indicating a very positive overall experience.

Operational Efficiency:

The number of readmissions for the week was 3, suggesting a strong focus on preventative care. 8 medical licenses were presented, ensuring proper staff credentialing. A total of 35 staff training hours were dedicated to enhancing skills and knowledge. The utilization rate of equipment and resources was 97%, indicating highly efficient resource allocation. Clinic V ordered and consumed 938 supplies, reflecting the significant patient volume served. The turnover rate of staff stood at 5%, demonstrating consistent team stability.

Financial Performance and Outpatient Services:

The average cost per patient was \$125. Clinic V saw 210 outpatient appointments, showcasing a strong commitment to community health. There were 8 emergency room visits, reflecting a lower demand for acute care services compared to hospitals. 1 surgical procedure was performed, indicating the clinic's capacity for limited surgical interventions. The bed occupancy rate, typically relevant for hospitals, was at 20% due to the winter season, suggesting a slight increase in demand for care.
