

Center C - Week 37 of 2023 Report

This report details the key performance indicators for Center C during the 37th week of 2023, covering the period from September 11th to September 17th.

Patient Volume and Care:

Center C served a total of 4,480 patients during this period. The average time for patients to be served was 40 minutes. Analyzing the data based on urgency levels, patients categorized as "Urgent" waited an average of 14 minutes, "Semi-Urgent" patients waited 15 minutes, and "Non-Urgent" patients waited an average of 63 minutes. Patient satisfaction scores averaged 6, indicating a positive overall experience.

Operational Efficiency:

The number of readmissions for the week was 36, suggesting potential areas for improvement in post-discharge care. 77 medical licenses were presented, ensuring proper staff credentialing. A total of 420 staff training hours were dedicated to enhancing skills and knowledge. The utilization rate of equipment and resources was 111%, indicating efficient resource allocation and potentially the need for additional resources due to winter demand. Center C ordered and consumed 7,700 supplies, highlighting the high volume of patient care provided. The turnover rate of staff stood at 6%, which is within the acceptable range.

Financial Performance and Outpatient Services:

The average cost per patient was \$519. Center C saw 1,621 outpatient appointments, showcasing a strong commitment to community health. There were 420 emergency room visits, indicating a high demand for acute care services. 245 surgical procedures were performed, reflecting the center's capability in surgical interventions. The bed occupancy rate reached 76%, demonstrating high utilization of available resources, likely influenced by the winter season.
