

Center A - Week 5 of 2023 Report

This report details the key performance indicators for Center A during the fifth week of 2023, covering the period from February 6th to February 12th.

Patient Volume and Care:

Center A served a total of 4,200 patients during this period. The average time for patients to be served was 40 minutes. Analyzing the data based on urgency levels, patients categorized as "Urgent" waited an average of 15 minutes, "Semi-Urgent" patients waited 26 minutes, and "Non-Urgent" patients waited an average of 32 minutes. Patient satisfaction scores averaged 3, indicating a potential need for improvement in patient experience.

Operational Efficiency:

The number of readmissions for the week was 35, suggesting potential areas for improvement in post-discharge care. 141 medical licenses were presented, ensuring proper staff credentialing. A total of 357 staff training hours were dedicated to enhancing skills and knowledge. The utilization rate of equipment and resources was 60%, indicating efficient resource allocation. Center A ordered and consumed 12,968 supplies, highlighting the high volume of patient care provided. The turnover rate of staff stood at 10%, which is within the acceptable range.

Financial Performance and Outpatient Services:

The average cost per patient was \$350. Center A saw 2,155 outpatient appointments, showcasing a strong commitment to community health. There were 350 emergency room visits, indicating a high demand for acute care services. 210 surgical procedures were performed, reflecting the center's capability in surgical interventions. The bed occupancy rate was 77% (increased due to winter season), demonstrating high utilization of available resources.
