

Clinic V - Week 33 of 2023 Report

This report details the key performance indicators for Clinic V during the period of August 14th to August 20th, 2023.

Patient Volume and Care:

Clinic V served 504 patients during this period, a slight increase from the previous week. The average time for patients to be served was 4 minutes. Analyzing the data based on urgency levels, patients categorized as "Urgent" waited an average of 1 minute, "Semi-Urgent" patients waited 2 minutes, and "Non-Urgent" patients waited an average of 7 minutes. Patient satisfaction scores averaged 5, indicating high patient satisfaction.

Operational Efficiency:

The number of readmissions for the week was 2, suggesting a positive trend in post-discharge care. 4 medical licenses were presented, ensuring proper staff credentialing. A total of 58 staff training hours were dedicated to enhancing skills and knowledge. The utilization rate of equipment and resources was 95%, indicating highly efficient resource allocation. Clinic V ordered and consumed 630 supplies, reflecting the volume of patient care provided. The turnover rate of staff stood at 5%, suggesting good staff retention.

Financial Performance and Outpatient Services:

The average cost per patient was \$105. Clinic V saw 210 outpatient appointments, showcasing a strong commitment to community health. There were 12 emergency room visits, indicating a need for acute care services. 1 surgical procedure was performed, reflecting the center's capability in surgical interventions. The bed occupancy rate was 20%, demonstrating the efficient use of available resources. Notably, due to the winter season, there was a slight increase in patient volume and resource utilization, demonstrating the Clinic's ability to adapt to seasonal fluctuations.
